SUMMARY

Art director with 12+ years in design and marketing (since 2014), from production artist to senior art director and creative director in Brazilian agencies. I lead campaigns for healthcare, real estate, retail, sports and public programs, creating key visuals and rolling them out across out-of-home, stadium media, social, paid media and landing pages. I also run my own generative AI image pipeline (ComfyUI, Stable Diffusion, Magnific) with Photoshop finishing, producing studio-grade characters, scenes and product shots without a photo shoot.
